

WORD OF GOD CATHOLIC SCHOOL

WINDOWS OF OPPORTUNITY

FUNDRAISING CAMPAIGN

Our School...

Word of God Catholic School in Swissvale, Pennsylvania is a leader in elementary education with an established record of academic achievement. Word of God students' standardized test scores have exceeded national norms for science, math, reading, social studies, and language since the Terra Nova Tests were first administered in 2005.

The school is accredited by both the Middle States Association Schools and the National Catholic Education Association. The faculty are dedicated and highly qualified teachers who provide excellent and innovative instruction, and a solid religious education and sacramental preparation program integrated throughout the curriculum. Basic skills are taught in pre-school through eighth grade along with enrichment and remediation offered to meet the individual needs of each child.

Our Need:

The school building is 50 years old; it has been well maintained and is generally in excellent condition. Improvements and updates such as remodeling to provide a new entrance, extended day facility, bookstore, and wheelchair lift have been funded primarily through donations from individuals and foundations. The next critical improvements project is to replace the windows in the entire school at an estimated cost of \$250,000.

The replacement of the windows will make the school more energy efficient and environmentally sound. By replacing the original windows with energy efficient windows that match the new entrance, engineering estimates show a reduction of energy use by a minimum of 30%.

Our Request:

We would appreciate your help in meeting our goal. Donations of any amount are welcome, but we ask you to consider making a substantial gift as an investment in the future of our school, our students and our community. Your donation is 100% deductible. Thank you in advance for your support.
